Why America should cut ties with Israel

America has had close ties with Israel since its establishment, likely out of sympathy from being prosecuted during WW2. However, this has come at a huge cost that not many Americans are aware of. Today, I'll explain some

The Israeli government hates Muslims:

Israel has shown time and time again during the massacre of Muslims in the Gaza that they are very intolerant of other religions. Many government officials and citizens have expressed a clear hatred for the Islam religion.

Burning flags is also not an uncommon form of protest, but if the IGO Anti-Boycott Act is passed, it will ban anyone from burning or damaging an Isra

Lastly, thanks to AIPAC's influence on social media (Tiktok specifically), reports have shown that anything supporting Palestine or criticizing Israel is at risk of getting the video or even your entire account permanently banned. Some internet conspiracy theorists even claim that you'll be put on a terrorist watchlist if you

I hope that after this little spiel, you'll realize just how dangerous and immoral it is to keep sticking by Israel's side. After I post this, my account (and possibly even my real-life safety) will be at risk, so PLEASE PLEASE PLEASE download this post, repost it, share it, archive it somewhere, and if this post gets taken
